

CHETAN SUTAR

Kalaburagi, Karnataka | PH: +91 9379090143 | chetansutar1220@gmail.com

EDUCATION

Dayananda Sagar Collage of Engineering
Bachelor of Engineering in Automobile Engineering

Bengaluru, India
Graduating : October 2026

Relevant Coursework: Vehicle Systems, CAD Design, Engineering Design, Manufacturing Processes

H.K.E. Society Polytechnic
Diploma in Automobile Engineering
Cumulative CGPA: 9.48

Kalaburagi, Karnataka
Graduated June 2023

St. Mary School
SSLC
Marks Obtained: 66.72%

Kalaburagi, Karnataka
2020

PROFESSIONAL SUMMARY

Automobile Engineering graduate with hands-on experience in CAD design, product development, fabrication, and regenerative electromagnetic suspension systems. Skilled in CATIA V5, SolidWorks, AutoCAD, ANSYS, MATLAB/Simulink, and project fabrication. Passionate about automotive design, vehicle systems, and engineering problem-solving.

WORK EXPERIENCE

New Holland Tractors
Industrial Training

Kalaburagi, Karnataka

- Explored tractor components, systems, and engine components.
- Gained practical exposure to tractor assembly and manufacturing processes.
- Visited automotive and agricultural exhibitions to explore new technologies and products

Toyota Motors
Industrial Training

Kalaburagi, Karnataka

- Studied customer reception to final vehicle delivery.
- Observed vehicle inspection, diagnosis, repair, maintenance, and quality checks.
- Learned the workflow between service advisors, technicians, and customers.

UNIVERSITY PROJECTS

Regenerative Electromagnetic Suspension System

Project Role: CAD & Simulation | 12 weeks

- Designed and fabricated a regenerative electromagnetic suspension prototype.
- Performed magnetic flux analysis using FEMM and MATLAB/Simulink.
- Developed a CAD model and validated prototype performance.

Mechanical Side Stand Monitoring System for Bike

Project Role: CAD Designer | 12 Weeks

- Designed and fabricated a motorcycle side stand monitoring mechanism.
- Created CAD drawings and manufactured the prototype.
- Improved rider safety by preventing riding with the side stand deployed.

Smart Theft Vehicle Detection & Immobilization System

Academic Project | 12 Weeks

- Developed an IoT-based security system using GPS, GSM, and RFID.
- Enabled real-time tracking and remote engine immobilization.
- Improved vehicle security through instant alerts.

ADDITIONAL

Technical Skills: CATIA V5, SolidWorks, AutoCAD, Autodesk Inventor, ANSYS, FEMM, MATLAB/Simulink, CAD Modeling, Design Validation

Languages: English, Kannada, Hindi

Certifications & Training: CATIA, Ansys, Creative Thinking, Corporate Culture
